

receiving the head and for retaining the neck of a suction cup in said opening; and
at least two fastener arrangements for fastening said device to the fixture.

2. (Original) A device according to claim 1, wherein the fixture and said device are made from metal, and said fastener arrangement is at least one weld of said device to the fixture.
3. (Original) A device according to claim 1, wherein said fastener arrangement is an adhesive.
4. (Original) A device according to claim 1, wherein the fixture and said device are made from metal, and said fastener arrangement is at least one brazing of said device to the fixture.
5. (Original) A device according to claim 1, wherein the fixture and said device are made from metal, and said fastener arrangement is at least one soldering of said device to the fixture.

Claims 6-10 (Canceled).

11. (Currently Amended) An assembly comprising:

a first pair of planar generally parallel, rigid wires;

a second pair of generally parallel, rigid wires co-planar with said first pair of rigid wires, each wire of said second pair of rigid wires is transverse to each wire of said first pair of rigid wires, defining a generally rectangular opening;

a fastener arrangement for fastening said assembly to a fixture; and

a suction cup having a compressible head attached to a neck, the neck attached to an engagement member, said head being insertable into said opening and said neck being retainable in said opening and said generally rectangular opening for receiving the head and for retaining the neck; said rectangular opening forming means for receiving the head and retaining the neck of a suction cup in said opening.

12. (Original) An assembly according to claim 11, wherein the fixture and said first pair of wires and said second pair of wires are made from metal, and said fastener arrangement is at least one weld

of said pairs of wires to the fixture.

13. (Original) An assembly according to claim 11, wherein said fastener arrangement is an adhesive.

14. (Original) An assembly according to claim 11, wherein the fixture and said first pair of wires and said second pair of wires are made from metal, and said fastener arrangement is at least one brazing of said pairs of wires to the fixture.

15. (Original) An assembly according to claim 11, wherein the fixture and said first pair of wires and said second pair of wires are made from metal, and said fastener arrangement is at least one soldering of said pairs of wires to the fixture.

Claims 16- 21 (Canceled).
